

Spring 2010

TUTORING

Small-Group Tutoring

Group tutoring offers consistent help throughout the term. Groups meet two hours per week and begin week 2 each term. Fee is \$120 per group per term.

Private Tutoring

TLC provides names of private tutors. Fees range from \$9-13 per hour. Lists are available beginning the second week of each term.

Fees must be paid at the time of enrolling in a tutoring group. Once enrolled, you are expected to attend the next available group session. If after this session you want to request a refund, you must do so in writing at TLC (68 PLC) before your tutoring group meets again. After this point, TLC assumes the tutoring arrangement is agreeable to both you and the tutor, and no refunds will be given.

Students may be able to receive reduced fees on tutoring as active members of the Student Support Services (SSS) program, PathwayOregon or the Office of Multicultural Academic Success (OMAS). Contact these offices directly for more information.

Math and Writing Labs

Monday - Friday
9am-4pm, 72 PLC

TLC offers free math and writing tutoring to UO students. The Math and Writing Labs are open on a drop-in basis from week two of the term through the Wednesday of finals week.

The **Math Lab** covers topics including calculus, trigonometry and algebra. Tutors can assist with clarifying concepts and processes to make homework more meaningful.

Using the **Writing Lab** can empower you as a writer. Tutors hold short, focused sessions to offer feedback that will allow you to take the next step in your brainstorming, writing and revision process. Our goal is to help you develop your ideas, express yourself clearly, and meet the expectations of academic writing. Appointments also available.

Weekly Academic Support - Drop-In

Study Skills - 68 PLC

Tuesday, Wednesday, Thursday
10am-12pm

Amy Nuetzman and
Elly Vandegrift

Interested in boosting your academic success? Drop in to learn and practice effective strategies for time management, organization, reading, note-taking, test preparation—and more!

Statistics - 12 PLC

Thursdays, 3-3:50pm
Doug Hintz

Can't tell a statistic from a parameter? Don't have confidence in your confidence intervals? Hypothetically speaking, are you confused by hypothesis testing? Drop-in support for Math 243, Psy 302, or Soc 312.
